

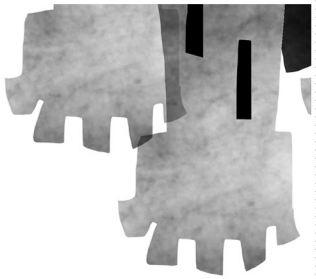
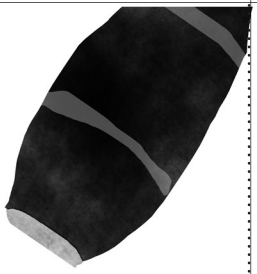
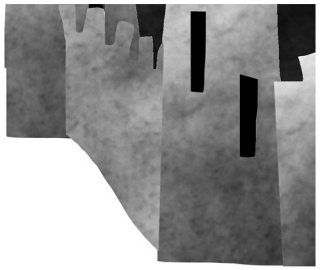
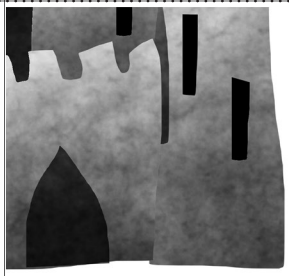
To solve this rather devious little folding puzzle -

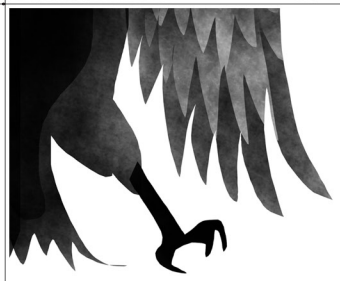
Print the puzzle as one sheet- double-sided print. Cut along the dotted lines and remove the four central squares. Fold the paper both inwards and outwards along the grid lines. Unfold.











There are six icons, each fragmented into four parts and spread across the front and back of the puzzle. Your goal is to bring the four pieces of each icon together to complete the image. Do this for all the six icons to solve the puzzle. Some folds are much harder than the others!
